React · Next.js · Node

DATA
PostgreSQL · Supabase · Firebase

BUILD
Telegram bots · CRM · Payments · AI integrations

SUMMARY

Fullstack developer building web, mobile, bots, CRM and AI-powered products — from idea to launch. Strong mobile core (Flutter / FlutterFlow), now delivering across web, backend and automation. I take a business task and close it end to end.

EXPERIENCE

- 2019

Started in dev

First websites and bots
- 2021

Mobile · FlutterFlow

Cross-platform mobile apps
- 2023

Fullstack

Web, backend, databases
- 2024

AI · Automation

AI integrations, CRM, payments
- now

In a team

Building products with a senior engineer

PROJECTS

- Flutter Marketplace

2024

Cross-platform marketplace on Flutter: real-time catalog, cart and payments.
- AI Telegram Bot

2024

Telegram bot with an AI assistant: chat, document Q&A and smart automations.
- Business CRM

2023

Custom CRM on Supabase/Postgres: deals, roles, analytics and team workflows.
- Web Platform

2023

Full-stack web platform with REST API, auth and an admin dashboard.
- Payments Automation

2025

Payment integration and back-office automation that halved manual work.
- Analytics Landing

2025

High-conversion landing with analytics, A/B tests and CRM integration.
